

COVID-19 - MIANZO's contingency measures

Dear All,

As we head towards a nationwide lockdown and uncertainty ahead, I would like to confirm that **Mianzo Asset Management, remains fully functional.**

- Since the start of the COVID-19 pandemic and in-line with the governments directive to support efforts to flatten the infection rate, we have a Business Continuity Plan in place and a management team that regularly reviews it in light of new information.
- Effective March 27th, all staff will work remotely from home. Our systems are geared and tested to ensure that we can handle the pressures emanating for the COVID-19 as it relates to how we work. This allows every one of us to embrace social distancing. Staff will receive regular updates on COVID-19 and to ensure that they practice good hygiene ethic at home.-
- We are ready for the total lockdown with our infrastructure, systems and technology having been upgraded to allow for Cloud computing.
- We remain available to manage and discharge our fiduciary duties on the mandates we manage on behalf of your clients.

Although set up to work away from the office our contact numbers will remain constant irrespective of our physical location.
