Fund Objectives

The primary objective of the portfolio will be to achieve capital growth with a reasonable level of income that is Shari'ah compliant (permissible) for investors through investment in the equity market.

INVESTMENT PROFILE

The Mianzo Islamic Domestic Equity 27four Fund will aim to achieve capital growth with a reasonable level of income that is Shari'ah compliant (permissible) for investors through investment in the equity market.

The investment policy followed by the Manager will focus on achieving this growth for investors primarily from securities listed on the JSE Securities Exchange that have been approved for investment by the SAC (Shari'ah Advisory Committee) from time to time. Securities in any of the aforementioned companies that are also listed on exchanges other than the JSE Securities Exchange may be acquired directly on those exchanges.

The portfolio will only invest in South African markets but is however permitted to include investments in offshore jurisdictions subject to the investment conditions determined by the Authority from time to time.

MEMBERS OF THE SHARI'AH SUPERVISORY BOARD

- Mufti Yusuf Suliman
- Mufti Ahmed Suliman
- Mufti Zaid Haspatel

In order to comply with the Shari'ah guidelines, the members of the SAC (Shari'ah Advisory Committee) must screen the stocks initially and monitor the holdings consistently to ensure compliance.

ISLAMIC INVESTMENT PRINCIPLES

The broad Islamic Investment Principles

- The investment must comply with Shari'ah principles that govern Islamic Investment Funds as well as the guidelines of the SAC.
- Investment in companies whose primary business is not consistent with Shari'ah principles is not permitted.
- Shares are required to meet certain financial metrics. This would include limits on interest bearing debt, interest earning assets, liquid assets (cash and accounts receivable) and interest income.
- Any portion of non-permissible income earned must be donated to charity.

Disclosures

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by 27four Collective Investments by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time 27four Collective Investments shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the 27four Collective Investments website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Portfolio performance figures are calculated for the portfolio. Full performance calculations are available from the manager on request.
